

REMARKS

Claims 1, 3, 5-17, 19 and 21-29 and 33-37 are all the claims pending in the application. Claims 2 and 4 have been cancelled and their limitations have been put into each of the independent claims. Claims 18 and 20 have been canceled as they are substantial duplicates of Claims 2 and 4, but with different dependencies. At the interview conducted on July 21, 2010, Applicant presented the arguments made in the prior response. At the interview, SPE Robert Kim stated that if the limitations of claims 2 and 4 were put into the independent claims, that they would overcome the outstanding rejection and would be allowable subject to an updating of the search by the examiner.

At the outset, Applicant would like to thank the Examiner and SPE for the courtesy of the interview conducted on July 21, 2010. In accordance with the statement by the SPE, Applicant has cancelled Claims 2 and 4 and has added the limitations of these two claims to each of the independent claims. In addition, the Interview Summary suggested that Applicant review the language of Claim 26. Review of Claim 26 and the specification reveal that Claim 26 is acceptable, as is. As set forth in paragraph 48, the entire structure can be formed of glass. At the Interview, the Examiner asked how the heater is formed of glass. In response, Applicant notes that as set forth in paragraph 59, the heater is patterned in the glass. Accordingly, Claim 26 is correct as written. It follows that the application should now be in condition for allowance.

In view of the above, reconsideration and allowance of this application are now believed to be in order, and such actions are hereby solicited. If any points remain in issue which the Examiner feels may be best resolved through a personal or telephone interview, the Examiner is kindly requested to contact the undersigned at the telephone number listed below.
